SCHOOLHOUSE
Alternative X

Alternative X was designed to address issues concerning:

- Carbone cactus habitat
- Tour bus waiting area
- Scenic view from Juticalpa Resort

Alternative X only differs from the proposed action in that it would:

- eliminate the parking on the north side of the schoolhouse by putting the parking in between the schoolhouses instead of behind
- provide one large parking lot – sufficient for tourbus waiting
- redesign the schoolhouses to one story – using a larger (4 acre) footprint to maintain the capacity
- footprint would be 4 acres and would be slightly farther away from the cactus habitat
- Shielded lighting is the same as the tweak in the proposed action
