SESSION 10.
ENVIRONMENTAL COMPLIANCE REALITIES AND CHALLENGES

Dakar, Senegal • June 2018
**SESSION BRIEFING**

| Objective                                      | Populate our “parking lot” with environmental compliance issues and challenges we are facing or questions we have.  
The facilitation team will take these on board to address to the greatest extent possible in the context of case studies and session work over the week. |

| Schedule | 5 minutes briefing / group formation  
30 minutes discussion  
10 minutes quick read-out |
DISCUSSION TOPICS

Now that we are experts on how the environmental compliance process should work, consider your experience of the reality and address the following topics:

1. What is one thing that you learned about your role in the process of environmental compliance?

2. What are the more consequential strengths and gaps in the environmental compliance process, in your experience? (e.g. with respect to programming areas, staff functions, processes.)

3. Discuss an activity where you believe environmental compliance is strong or where it has been particularly weak. What are the underlying drivers or root causes contributing to this?

4. Are their commonalities in the success or failures that your group discussed?

Recorders: organize read-out by learning objectives, gaps, strengths, possible root causes. No attribution!
